SUMMARY

Backend-oriented Full-Stack Developer with hands-on experience building REST APIs, integrations, and backend services using Django, Django REST Framework and FastAPI. Strong understanding of relational and NoSQL databases (PostgreSQL, MongoDB), API design, authentication, and data validation. Experienced in deploying production applications on AWS and Azure. Confident in frontend development using JavaScript, React, HTML/CSS, and Bootstrap. Detail-oriented, fast-learning, with strong structured problem-solving skills. Comfortable with debugging and working with logs.

WORK EXPERIENCE

01/2024 - 07/2024

Python Backend Developer — IT-BRAINS

- Developed backend functionality using Django/DRF and FastAPI
- Designed models and migrations, optimized SQL queries
- Built and Integrated external APIs with external services
- Configured and supported deployments to AWS EC2 and Azure
- Implemented logging, debugging, and error handling
- Participated in Agile processes and Git-based workflows
- Focused on clean code, maintainability, and backend problem-solving

PROJECTS

Mix-Box-Sale — Full-Stack E-commerce Platform

- Built the entire application from scratch: backend, frontend, and deployment
- Backend: Django + PostgreSQL
- Frontend: JavaScript, HTML, CSS
- Implemented user authentication, product categories, shopping cart, and checkout
- Integrated a Telegram bot for automated order notifications
- Deployed on AWS EC2 with production configuration
- Designed backend architecture with focus on scalability and maintainability

Event-Finder — Event Management API

- Developed a REST API for event creation, ticket booking, and reviews
- Features: authentication, CRUD operations, ratings, notifications
- Technologies: Django REST Framework, Docker, PostgreSQL
- Implemented authentication, permissions, and API validation logic

EDUCATION

Bachelor in Computer Science — ONTU (2023–2027)

Python Backend Developer — IT-BRAINS (2023–2024)

Modern Web Design & JavaScript — ITNetwork.cz (2025–2026)
